Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Synchronous

Brief describe the provision in LMS to be used by HEI :-

The Synchronous learner engagement techniques are pedagogically devised and strategically implemented to meet the intended learning outcomes of a course. Below are the key LMS (Learning Management System) features which facilitate the synchronous teaching-learning: 1. Virtual Classrooms: These classrooms are conducted over the LMS, where live sharing of desktop screen, presentations, documents, whiteboards etc. are facilitated between the faculty and learners in real time. It is further supplemented with two-way audio communication channel for the emotional connect of learners and teacher, while the real-time chat feature allows learners with low band width of internet to participate in the session. These classrooms are referred to as "Live Interactive Sessions" and students are also given the opportunity to present themselves in front of the participants. 2. Discussion Forums: The case study/ topic based discussion forums are moderated by the faculty in both synchronous and asynchronous mode. The faculties are available for live interaction with the students, five days a week, as per the notified schedule. This feature gives an extra edge for engaging students on a daily basis and thereby ensures that the practical approach of the learned topics are grasped by the learners through Case Studies/ topics/ articles. 3. Chat Forum (Ask Your Mentor): "Ask Your Mentor" is an active chat feature of the LMS, which can also be accessed through Mobile App, anywhere and anytime. The faculties respond in real time, depending upon their availability and hence encourage better inferences and conceptual clarity of the topics. Also, the above features are enhanced by the auto alert system and notifications.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :-

Assessment mechanism	Ticket Management System will ensure the smooth process of queries and responses with appropriate time and escalation matrix

Identified technological interface and interoperability	UVdesk - PHP based ticketing system is by far the most powerful yet intuitive and exciting Open Source project of 2020. Since it is built on PHP, the in house IT maintenance will be able to do all customization.
Learner's Authentication Requirements	SIS & LMS are integrated with AADHAAR or other government recognized identity for Indian students and Passport for foreign students: Student needs to submit any ID Govt Id proof during filling the registration form on GLA Online Registration Platform. Indian Students are asked to submit (AADHAR) and students with foreign nationality will be submitting valid Passport copy. The submitted documents are then verified by Admission department to authenticate the student. Upon authorization from admission department, the student will be communicated with unique username & randomly generated password.
Learner Registration - through a web application	The Online Registration System capture student details in 3 steps: 1.Basic information including Address and Identify proof 2. Qualification details and documents to check eligibility 3. Fee Payment to enroll into respective programme. 4. Learning Management System access
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	In the field of Online Learning, Learning Analytics is the need of the hour for improving the overall quality of delivery in education and ensuring the accomplishment of learning outcomes of a program. At GLA, learning analytics plugin is incorporated in the LMS, to enhance the learner engagement and report accordingly to counter act on the short comings of teaching-learning activities. Below are the key features of the analytics tool: • By capturing user interactions (Virtual Learning Environment data) within the LMS environment, the analytics tool is able to provide detailed understanding on how LMS is being used by faculty and learners during their teaching-learning process. • Collects user activity data to generate reports. The reports can show adoption on an institution, department, course or individual user level. • Course activity reports are available for instructors • Live tracking of user activity in LMS, with respect to: - Context (where) - Actions (what) - Time (when) 2) Take Action • Based on the reports, targeted interventions and training could be done • Measure the impact of interventions. • Sending periodic alerts and reminders for due dates and inactivity in LMS
Payment Gateway –using Digital Payment system	Admission platform has the provision to pay fees online via various PG (UPI) ,student can pay fees by using Credit card, Debit card and Internet baking.
Tracking the delivery of a Course or programme	To facilitate the flexibility in delivering a course, the Learning Management System functions as a platform where all the activities are conducted and monitored. The tracking process for the different delivery phases are: 1. PRE-Delivery: During this phase, the courses are created with a standard structure which maintains the uniformity for all deliverables throughout all courses. The Subject Matter Expert (SME), LMS Team and Instructional Designers (IDs) work collectively to define the best pedagogical pattern of delivering different types of learning materials. Auditing and continuous monitoring is done by the LMS team to ensure that the same structure is being implemented; as planned. Complementing the same, content auditing ensures the availability of learning materials for all navigation tabs in the LMS. 2. DURING-Delivery: The Quality Compliance member has a significant role in this phase and ensures that the correct content is delivered to the learners for study. GLA follows "Just in Time" (JIT) technique of Quality Management to ensure the delivery of right content at the right time to the right user. 3. Post-Delivery: This phase is the most crucial and ensures that the contents are being accessed by learners for completion of learning outcomes. Learning Analytics with graphical reporting helps to track the faculty-learner activities inside a course and helps in promoting learner engagement
Technical Know-how or Skills Requirements	Basic computer operating knowledge Basic idea about connectivity & troubleshooting
